

# ENTICE WORKSHOP

## Illinois Wild Mammals

October 1, 2016

Shawnee National Forest Office, Vienna

9:00 a.m. – 3:00 p.m.

Mammals can be found in all Illinois habitats, but what do you really know about them? We often see what they leave behind instead of seeing them. Come to this workshop to learn about the variety of mammals found in Illinois, their habits and their interactions with other organisms and the environment. We'll show you how the *Illinois Wild Mammals* trunk can help you teach Next Generation Science Standards, too. Designed for educators of grades kindergarten through six, we'll provide you with background information, hands-on lessons and supplemental resources that will let you implement this topic into your curriculum immediately. Teachers of other grade levels are welcome to attend the workshop but may need to adapt the materials, as appropriate. Professional Development Hours are available. Sponsored by the Illinois Department of Natural Resources, this workshop is part of the ENTICE (Environment and Nature Training Institute for Conservation Education) program. Register at <https://www.enticeworkshops.com>.
